Radford's Artistic Bungalows

The bungalow age is here. It is the renewal in artistic form of the primitive "love in a cottage" sentiment that lives in some degree in every human heart. Architecturally, it is the result of the effort to bring about harmony between the house and its surroundings, to get as close as possible to nature.

So we see the bungalow nestling in the woods, inviting with its hospitality on the plains and roosting serenely on the crags by the sea. In every case its appearance bespeaks a blithesome geniality and an informal hospitality. There is nothing formal about it, and this very restfulness of appearance refreshes the city tired dweller who is the slave of conventionalities.

The bungalow is a tangible protest of modern life against the limitations and severities of humdrum existence. It is "homey," and comes near to that ideal you have seen in the dreamy shadows of night when lying restless on your couch you have yearned for a haven of rest. Maybe it has a wide, low, spreading roof, which sweeps down and forms a covering for the porch. It has a large healthy chimney, patios, with fountains, large verandas, good sized living and dining rooms, so arranged possibly that by the use of portable wood screens they may be partitioned off or thrown into one apartment.

And while primarily intended for the wilds, this form or style of home has been seized upon eagerly by home builders in every hamlet of the land, in every town and every city. So that out of this general demand for homes of this character all sections of the country are being beautified with little structures that delight the eye.

The bungalow originated in India where many types of them are seen. Frequently there the structure is built on stilts from eight to twelve feet high, to protect the occupants from wild animals and serpents. In America, however, the bungalow cannot be built too close to the ground, and, indeed, the purpose always should be to make the bungalow a harmonious part of the grounds surrounding it. Wide cemented porches are frequently laid flat on the surface, so that the indoors and outdoors might be said to join hands. Rustic baskets frequently ornament porch walls built of cobble-stones or clinker brick. There really is no limit to the ornamentation of the bungalow that will be in keeping with its character. Fountains may be placed, or even miniature waterfalls, that will add to the effect. In every case the artistic sense of the builder must be expressed in accord with the immediate location. The beauty and restfulness of little sun parlors caress tired nerves and make new men out of old. A riotous, untrimmed garden of ferns may be added to the lawn decorations, or clambering roses, vines and wide-spreading trees.

It is on account of the great attractiveness of the bungalow and the great demand for buildings of that construction by home builders that this volume is offered to the public. In its preparation a vast amount of deep study of the subject, and tireless energy, have been given by the most eminent architects of the country. So that in this volume is condensed the best thought on bungalow construction that it is possible to secure. The home builder will find here every style of bungalow that has proved itself worthy of being classed with that form of construction, so that any taste may be suited.

If the reader intends to build a bungalow he may be assured of a number of facts that commend themselves to him about the houses shown in this book.

Every design shown is intended for the man of moderate means.

Most of them can be built at an outlay no greater than that for a severe, old-style unornamented house.

There are designs for small families and others for large ones.

Each design is original.

If any person is intending to build a home and is limited in his means, he cannot do better than to build a bungalow. It matters not whether it be in the city or in the country, for a bungalow built after any design in this book will be an ornament anywhere.

Remember this: It is always possible and easy to sell a bungalow when the plain house of the same cost would find no sale. This is the most important factor, financially, concerning the subject of home building. Too often home builders construct houses that lack style, and when a rainy day comes and they want to sell the house, there is no buyer, because the house is "like thousands of others."

The reason why a house will not sell in nine cases out of ten is because it has no individuality.

A bungalow has individuality. It has that something that makes passersby turn after they have passed the house and say, "How cozy."

It is the "cozy" house that it pays to build.

It is the "cozy" house that your wife wants to live in.

It is the "cozy" house that always sells.

Now, if you have decided to build a bungalow, the next step will be to select the design from this book. In selecting the design consider well the needs of the family, as to room, and also the natural surroundings and lay of the lot you are going to build on. That will have much to do with the design. And in placing the location of the building on the lot, do not build exactly in the center of the lot as so many do, but place the structure at one side or well back, so that the grounds will be ample for trees and shrubbery, making the bungalow and the grounds one harmonious whole.

Having selected your design, the next step is to order your plans Never build without plans. You probably will not have to go out of your own neighborhood to find unfortunates who have tried to build without plans, thinking they could watch the construction and save the price of the plans. You know how they worried their lives nearly out, how they saw the materials going to waste that were cut up haphazard and by guess, and how there was no style to the house or it was, and is, an eyesore in the neighborhood.

A man who builds a house owes a duty not alone to himself but to the neighborhood as well. He really has no moral right to construct a home that will be a blight on the landscape. The other home owners in the neighborhood have some rights. The kind of house built without plans is the kind that lacks all the style and makeup that help beautify any neighborhood. It is the most expensive house to build, too. There is loss in materials, loss in time—ripping out work that has been incorrectly placed—loss in the time of workmen, and, worst of all, the loss in nervous energy because of sleepless nights due to trying to think out ways to correct mistakes due to the lack of well and correctly drawn plans.

The plans for every bungalow shown in this book were drawn by the best licensed architects, men who have made a life study of home construction, who know the economy of planning buildings that make possible the use of the standard sizes of lumber, who know the artistic requirements of a bungalow, and who in every detail of the plan have had in view the production of the greatest amount of room, solidity of construction and ornamentation with the least outlay. So we repeat—never build without plans.

As a rule the prospective home builder has determined on a fixed amount which he wants to spend on his house. This is wise and business-like. As to the cost of the houses built after the various designs in this book, a minimum and maximum price can be given, but the only way to get accurate figures is to go to your responsible building material dealer, who will give you an accurate estimate. He is the only man who can do so, because he knows the price of all the material in your neighborhood, the cost of freight, and the price of labor. All these factors vary in different parts of the country. For instance, cement may be $1.50 a barrel in one section and $2.25 in another. So that a bungalow which would be built for $1,200 in one section would cost $1,800 in another part of the country. So you can readily see that the local price of materials, freight and labor in your own immediate neighborhood are the determining factors. And the only man who knows all these figures is your responsible dealer. He will gladly give you the estimate, because he is the man who probably will supply you with the materials for your bungalow.

We Illustrate in this Book

the perspective view and floor plans of over 250 low and medium-priced houses. In the preparation of this work great care has been exercised in the selection of original, practical and attractive house designs, such as seventy-five to ninety per cent of the people to-day wish to build. In drawing these plans special effort has been made to provide for the MOST ECONOMICAL CONSTRUCTION, thereby giving the home builder and contractor the benefit of the saving of many dollars; for in no case have we put any useless expense upon the building simply to carry out some pet idea. Every plan illustrated will show, by the complete working plans and specifications, that we give you designs that will work out to the best advantage and will give you the most for your money; besides every bit of space has been utilized to the best advantage.

$100.00 Plans for only $10.00

This department has for its foundation the best equipped architectural establishment ever maintained for the purpose of furnishing the public with complete working plans and specifications at the remarkably low price of only $7.00 to $15.00 per set. Every plan we illustrate has been designed by a licensed architect, who stands at the head of his profession in this particular class of work and has made a specialty of low and medium-priced houses. The price usually charged for this work is from $75.00 to $100.00.

What We Give You

The first question you will ask is, "What do we get in these complete working plans and specifications? Of what do they consist? Are they the cheap printed plans on tissue paper without details or specifications?" We do not blame you for wishing to know what you will get for your money.

Blue Printed Working Plans

The plans we send out are the regular blue printed plans, drawn one-quarter inch scale to the foot, showing all the elevations, floor plans and necessary interior details. All of our plans are printed by electricity on an electric circular blue-printing machine, and we use the very best grade of electric blue-printing paper; every line and figure showing perfect and distinct.

Foundation and Cellar Plans

This sheet shows the shape and size of all the walls, piers, footings, posts, etc., and of what materials they are constructed; shows the location of all windows, doors, chimneys, ash-pits, partitions, and the like. The different wall sections are given, showing their construction and measurements from all the different points.

Floor Plans

These plans show the shape and size of all rooms, halls and closets; the location and size of all doors and windows; the position of all plumbing fixtures, gas lights, registers, pantry work, etc., and all the measurements that are necessary are given.

Elevations

A front, right, left and rear elevation are furnished with all the plans. These drawings are complete and accurate in every respect. They show the shape, size and location of all doors, windows, porches, cornices, towers, bays, and the like; in fact, give you an exact scale picture of the house as it should be at completion. Full wall sections are given, showing the construction from foundation to roof, the height of stories between the joists, height of plates, pitch of roof, etc.

Roof Plan

This plan is furnished where the roof construction is at all intricate. It shows the location of all hips, valleys, ridges, decks, etc. All the above drawings are made to scale one-quarter inch to the foot.

Details All necessary details of the interior work, such as door and window casings and trim, base, stools, picture moulding, doors, newel posts, balusters, rails, etc., accompany each set of plans. Part is shown in full size, while some of the larger work, such as stair construction, is drawn to a scale of one and one-half inch to the foot. These blue-prints are substantially and artistically bound in cloth and heavy water-proof paper, making a handsome and durable covering and protection for the plans.

Specifications The specifications are typewritten on Lakeside Bond Linen paper, and are bound in the same artistic manner as the plans, the same cloth and water-proof paper being used. They consist of twenty-two pages of closely typewritten matter, giving full instructions for carrying out the work. All necessary directions are given in the clearest and most explicit manner, so that there can be no possibility of a misunderstanding.

Basis of Contract The working plans and specifications we furnish can be made the basis of contract between the home builder and the contractor. This will prevent mistakes, which cost money, and they will prevent disputes which are unforeseen and never settled satisfactorily to both parties. When no plans are used the contractor is often obliged to do some work he did not figure on, and the home builder often does not get as much for his money as he expected, simply because there was no basis on which to work and upon which to base the contract.

No Misunderstanding Can Arise when a set of our plans and specifications is before the contractor and the home builder, showing the interior and exterior construction of the house as agreed upon in the contract. Many advantages may be claimed for the complete plans and specifications. They are time savers, and, therefore, money savers. Workmen will not have to wait for instructions when a set of plans is left on the job. They will prevent mistakes in cutting lumber, in placing door and window frames, and in many other places where the contractor is not on the work and the men have received only partial or indefinite instructions. They also give instructions for the working of all material to the best advantage.

Free Plans for Fire Insurance Adjustment You take every precaution to have your house covered by insurance; but do you make any provision for the adjustment of the loss, should you have a fire? There is not one man in ten thousand who will provide for this embarrassing situation. You can call to mind instances in your own locality where settlements have been delayed because the insurance companies wanted some proof which could not be furnished. They demand proof of loss before paying insurance money, and they are entitled to it. We have provided for this and have inaugurated the following plan, which cannot but meet with favor by whoever builds a house from our plans.

Immediately Upon Receipt of Information from you that your house has been destroyed by fire, either totally or partially, we will forward you, free of cost, a duplicate set of plans and specifications, and in addition we will furnish an affidavit giving the number of the design and the date when furnished, to be used for the adjustment of the insurance.

Without One Cent of Cost to You and without one particle of trouble. We keep a record of the number of the house design and the date it was furnished, so that, in time of

loss, all it will be necessary for you to do is to drop us a line and we will furnish the only reliable method of getting a speedy and satisfactory adjustment. This may be the means of saving you hundreds of dollars, besides much time and worry.

Our Liberal Prices

Many have marveled at our ability to furnish such excellent and complete working plans and specification at such low prices. We do not wonder at this, because we charge but $7.00 to $15.00 for a more complete set of working plans and specifications than you would receive if ordered in the ordinary manner, and when drawn especially for you, at a cost of from seventy-five to one hundred dollars. On account of our large business and unusual equipment, and owing to the fact that WE DIVIDE THE COST of these plans among so many, it is possible for us to sell them at these low prices. The margin of profit is very close, but it enables us to sell thousands of sets of plans, which save many times their cost to both the owner and the contractor in erecting even the smallest dwelling.

Our Guarantee

Perhaps there are many who feel that they are running some risk in ordering plans at a distance. We wish to assure our customers that there is no risk whatever. If, upon receipt of these plans, you do not find them exactly as represented, if you do not find them complete and accurate in every respect, if you do not find them as well prepared as those furnished by any architect in the country, or any that you have ever seen, we will refund your money upon the return of the plans from you in perfect condition. All of our plans are prepared by architects standing at the head of their profession, and the standard of their work is the very highest. We could not afford to make this guarantee if we were not positive that we were furnishing the best plans put out in this country, even though our price is not more than one-seventh to one-tenth of the price usually charged.

Bill of Material

We do not furnish a bill of material. We state this here particularly, as some people have an idea that a bill of material should accompany each set of plans and specifications. In the first place, our plans are gotten up in a very comprehensive manner, so that any carpenter can easily take off the bill of material without any difficulty. We realize that there are hardly two sections of the country where exactly the same kinds of materials are used, and, moreover, a bill which we might furnish would not be applicable in all sections of the country. We furnish plans and specifications for houses which are built as far north as the Hudson Bay and as far south as the Gulf of Mexico. They are built upon the Atlantic and Pacific Coasts, and you can also find them in Australia and South Africa. Each country and section of a country has its peculiarities as to sizes and qualities; therefore, it would be useless for us to make a list that would not be universal. Our houses, when completed, may look the same whether they are built in Canada or Florida, but the same materials will not be used, for the reason that the customs of the people and the climatic conditions will dictate the kind and amount of materials to be used in their construction.

Estimated Cost

It is impossible for anyone to estimate the cost of a building and have the figures hold good in all sections of the country. We do not claim to be able to do it. The estimated cost of the houses we illustrate is based on the most favorable conditions in all respects, and includes everything but the plumbing and heating. We are not familiar with your local conditions, and, should we claim to know the exact cost of a building in your locality, a child would know that our statement was false. We leave this matter in the hands of the reliable contractors, for they, and they alone, know your local conditions.

We Wish to be Frank With You and therefore make no statement that we cannot substantiate in every respect. If a plan in this book pleases you; if the arrangement of the rooms is satisfactory, and if the exterior is pleasing and attractive, then we make this claim—that it can be built as cheaply as if any other architect designed it, and we believe cheaper.

We Have Studied Economy in construction, and our knowledge of all the material that goes into a house qualifies us to give you the best for your money. We give you a plan that pleases you, one that is attractive, and one where every foot of space is utilized at the least possible cost. Can any architect do more, even at seven to ten times the price we charge you for plans?

Reversing Plans We receive many requests from our patrons for plans exactly according to the designs illustrated, with the one exception of having them reversed or placed in the opposite direction. It is impossible for us to make this change and draw new plans, except at a cost of about eight times our regular price. We see no reason why our regular plans will not answer your purpose. Your carpenter can face the house exactly as you wish it, and the plans will work out as well facing in one direction as in another. We can, however, if you wish, and so instruct us, make you a reversed blue-print and furnish it at our regular price; but in that case all the figures and letters will be reversed, and, therefore, liable to cause as much confusion as if your carpenter reversed the plan himself while constructing the house.

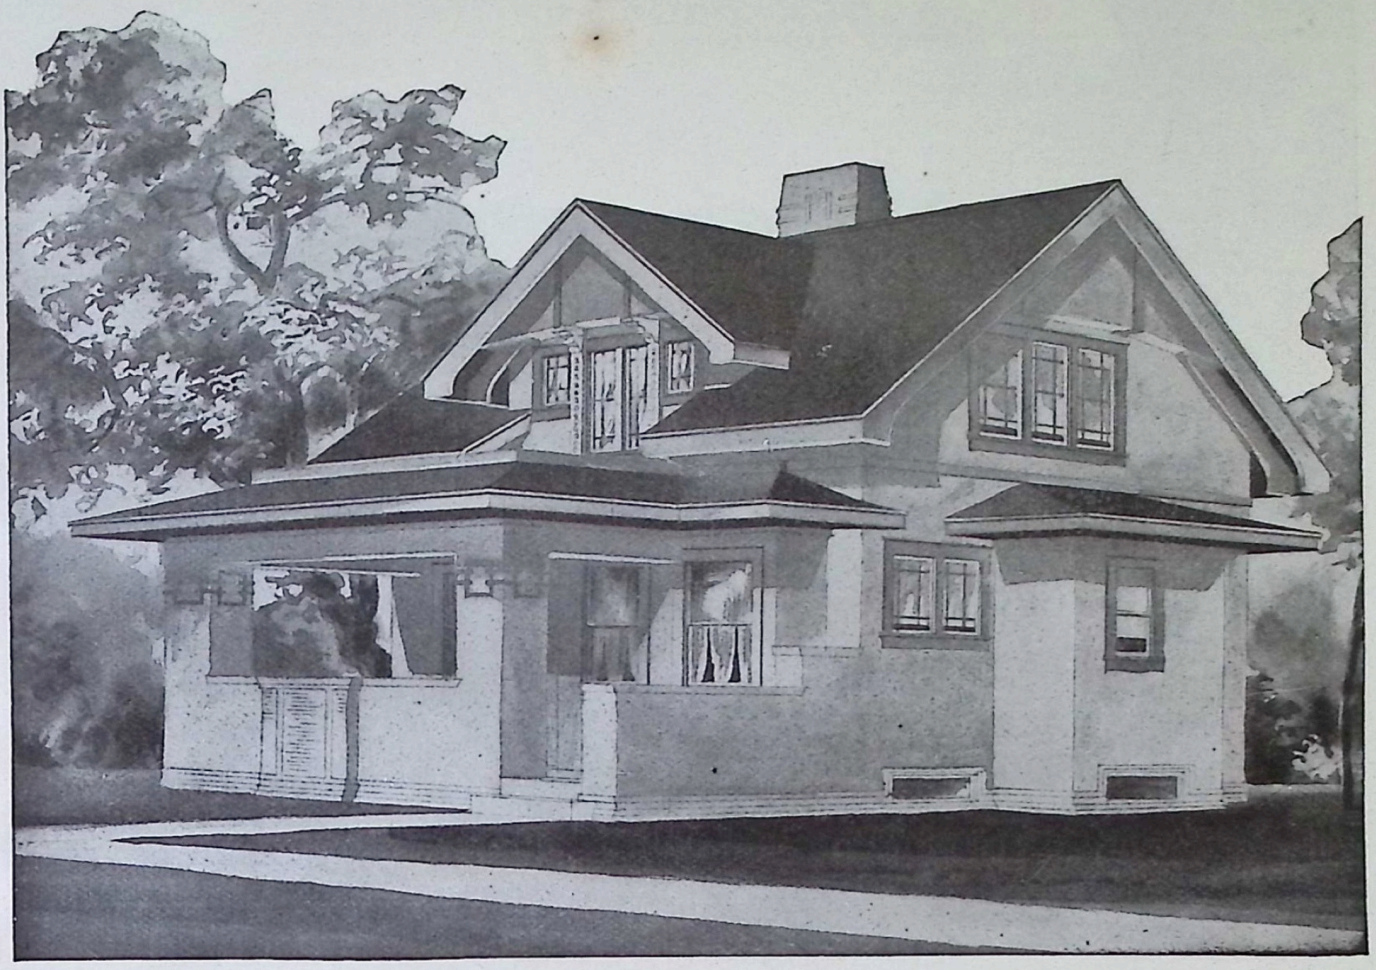
We Would Advise however, in all cases where the plan is to be reversed, and there is the least doubt about the contractor not being able to work from the plans as we have them, that two sets of blue-prints be purchased, one regular and the other reversed, and in such cases we will furnish two sets of blue-prints and one set of specifications for only fifty per cent added to the regular cost, making the $10.00 plan cost only $15.00.

Immediate Delivery Guaranteed Our equipment and facilities are such that we can send out the same day we receive order the complete plans and specifications for any house we illustrate. Delivery is made by express whenever possible, otherwise plans and specifications are forwarded by mail.

PUBLISHED BY

The Radford Architectural Co.

178 W. Jackson Boulevard, Chicago, Illinois



Design No. 5079

Size: Width, 32 feet 6 inches; Length, 25 feet

ESTIMATED COST OF HOUSES

LET us give you this advice in the matter of an estimate of the cost of any house in this book—consult the Responsible Lumber Dealer and Responsible Contractor in your own immediate neighborhood. They know all the conditions that enter as factors in the cost of a house in your locality. They know what labor costs, and all the other things that govern the price of materials. You will see readily that these are varying quantities and a price that might be true in one locality will not hold in another. We might give you a price, but it would not help you and might cause you embarrassment in addition to making ourselves ridiculous, because we do not know the conditions in your locality as the Responsible Dealer and Responsible Contractor do.

So let us tell you this. If there is a house in this book that you want to build, the first thing to do is to consult the Responsible Dealer and Responsible Contractor. In all likelihood he is your friend and neighbor. You can depend on what he will tell you after he figures on the plan, for he has had the experience in your locality and knows the costs of all the materials that will be used in the house—knowledge of a specific nature that we do not possess, neither does any one else who is not on the ground.

We are perfectly honest and fair with you in this matter. This much we can tell you, however. In every locality it is safe to say there are seasons of the year when it will cost less to build than at others. It is for the Responsible Dealer and Responsible Contractor to direct you when it is the most opportune time to commence operations. The labor market varies. The cost of materials varies. These are things over which we have no control; nor have you.

Let us tell you this also—Never build or even think of doing so without plans. They will save you money and worry. This applies to all localities. The plans in this book have been prepared by the most skilled licensed architects in the country and one motive has actuated them—the most economy consistent with style and utility. The best this Company can tell you, therefore, in the matter of arriving at a satisfactory estimate is to consult the Responsible Dealer and Responsible Contractor in every case. They are thoroughly conversant with all the conditions that govern cost and are intimately familiar with the material market in your neighborhood. Having this estimate and the set of plans and specifications you will be safely on the road to the construction of your home—and success to you.

Some people are led astray by estimated costs, so called, when you know and we know that the only ones who know and who can give an accurate estimate are the people on the ground.

Don't Take the Word of an Outsider in the estimate of the cost of a house. At best he can only guess. The figures he gives may be true of his locality but may be hundreds of dollars out of the way as far as your neighborhood is concerned.

Get Your Estimate from People Who Are on the Ground—People who have made a study of these things, people whose business it is to know all the facts, people who are your neighbors and will not mislead you either intentionally or unintentionally.

OUR GUARANTEE

THIS is right to the point and from the shoulder: If you do not find the plans exactly as represented, if you do not find them as accurate and as well prepared as those furnished by any architect in the world we will refund your money. You run no risk whatever under this guarantee. We make this guarantee strong to disabuse the mind of any person who has the idea that these plans are of the cheap and flimsy kind because they are sold at such a low price. Every set of plans sent out by this Company has been prepared by a licensed architect who has gained a high place in his profession as the creator of new ideas in home architecture and who has given many years to the study of American home builder's needs. Remember—you run no risk whatever. If you do not find the plans exactly as represented and as good as any you ever saw we will refund your money.

INDEX

Design.	Page.	Estimated Cost. From About.	Estimated Cost. To About.	Price Plans and Specifications.

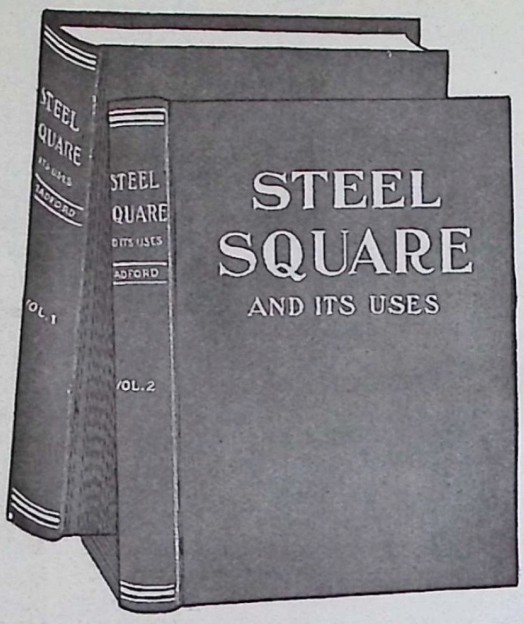
The Most Wonderful Books Ever Published

A Complete Encyclopedia on the Practical Uses of the Steel Square



Just Published This very valuable and practical work is published for the first time. It is up to the minute, being issued January 1, 1907. This splendid edition is a brand new book from cover to cover, written in simple, plain, every-day language so that it can be easily understood and followed. Information of value that has appeared in former works appears in this work, together with a vast amount of new, practical, every-day information, such as is necessary for every progressive and successful carpenter to know.

This Up-to-Date and Practical Work on the application of the steel square, treats of the laying of the rafters, finding the lengths of jacks, securing bevels, laying out hopper bevels, treating of the steel square as a calculating machine, and showing how to measure solids, surfaces and distances.

Special Chapters are devoted to that part of stair building to which the steel square can be applied. Other chapters treat of the adjustable fence, roof framing, hipped roof framing, hoppers and hopper bevels, combination squares, key to the steel square, possibilities of the steel square, polygons and miters, pitches and roof framing, and miscellaneous rules and examples.

Practical and Instructive Illustrations to the number of more than 300 are scattered through this work. These illustrations are not technical mathematical designs, nor geometrical problems, but are the thoroughly practical illustrations of a thoroughly practical text, bringing to the attention of the carpenter such points of interest and information as he needs in his every-day business. While the text and descriptive matter are so accurate and easy of comprehension that they could be understood without even the assistance of the illustrations, nevertheless the book has been thoroughly and profusely illustrated with diagrams and drawings.

Remember this work is absolutely up to date (being issued January 1, 1907). Each volume measures 6x9 inches, and contains over 300 pages, being the largest books on the steel square ever published. They are bound in cloth with attractive cover designs, handsomely stamped. Printed on the best quality of paper. Each volume contains 50 house plans. If not satisfactory in every way they can be returned after examination and your money will be refunded.

The Department of Questions and Answers in Volume II is one of the most useful, interesting and instructive parts of this work. In this part numerous questions, which have been sent the editors by practical carpenters all over the country, have been fully answered. They are questions which come up in your work every day, and the solutions of these practical problems here given will prove a valuable aid to you.

The Most Practical Books Ever Published

A Complete Up-to-Date Explanation of Modern Carpentry

New Special Edition This work, "Practical Carpentry," is absolutely new, being completed only January 1, 1907. It is written in simple, plain, every-day language so that it can be easily understood.

It is the Most Complete most accurate, most up to date and most practical work upon this subject. It contains the best and quickest methods for laying roofs, rafters, stairs, floors, hopper bevels, mitering, coping, splayed work, circular work, and, in fact, for forming all kinds of joinery and carpenter work.

Special Chapters are Devoted to Building construction, which takes the carpenter from foundation to roof, with complete illustrations of each detail, such as foundation, windows, cornices, doors, roofs, porch work, etc. There are also special chapters devoted to good and faulty construction and all kinds of framing, geometry, arches, centers, window and door heads, steel square in carpentry, house framing, roofs and roof construction, building construction, covering of roofs, mouldings, joints, straps and other fastenings, stair building and questions and answers on all subjects pertaining to the building industry.

400 Special Illustrations There are over 400 illustrations; many of them cover an entire page, and they illustrate completely and instructively the text. They show the detail and actual construction down to the minutest point. They enable the reader to understand the text easily and to follow the work in hand without difficulty.

Remember this work is the latest one published on this extensive subject (issued January 1, 1907). Each volume measures 6x9 inches, and is bound in cloth with cover design attractively stamped. Contains more than 300 pages in each volume. Printed on an excellent quality of paper. Each volume contains 50 modern house plans. If not satisfactory in every way they can be returned after examination and your money will be refunded.

We are fortunate in being able to present a number of full-page details, showing the construction of cornices, porches, stairs, etc., which were prepared for this work by G. W. Ashby. They show the construction of each part completely, and complete dimensions are given in all cases.

SPECIAL PLANS AFTER YOUR OWN SKETCHES

AT POPULAR PRICES

If you prefer to have a home constructed after your own ideas of arrangement, we would like very much to help you in developing your plans, or assist you in any way to solve the problem of a plan for your new home.

There are scores of people who spend years in planning and designing the home they wish to build, and, in many cases, never cease regretting that it does not come up to their requirements. "Home made" plans are inaccurate and cause endless worry, waste of materials and extra expense. With our long experience and with the equipment and the facilities we have for handling work of this kind, we can relieve you of the trouble and anxiety of planning your own home, save you time and money and furnish you with plans that we know will be entirely satisfactory. All we ask is an opportunity to demonstrate our ability to please you.

CORNER OF DRAFTING ROOM.

Our work is by no means confined to the designing and planning of houses, for, in addition to this class of work, we make a specialty of such work as:

Schoolhouses, Office Buildings, Bank Buildings, Factories, Town and Lodge Halls, Churches, Hotels, Public Libraries, Stores, Farm and Outbuildings and All Kinds of Public Buildings.

Our Special Department is the finest of its kind in the country, being under the personal supervision of Licensed Architects, who have experience in handling all kinds of work, and they have the assistance of a corps of competent draftsmen.

Our location, equipment, and facilities for handling work of all kinds cannot be excelled. Every plan we design or develop is guaranteed to be complete and accurate in every respect. We can get plans out in the quickest time possible and at a price that cannot help but interest you.

Our experience being of such long duration and our work extending over such a large territory, enables us to give you the most satisfactory results in every instance.

Our aim is to please you. Our whole organization is at your service. Consult us before purchasing your plan. We can save you money.

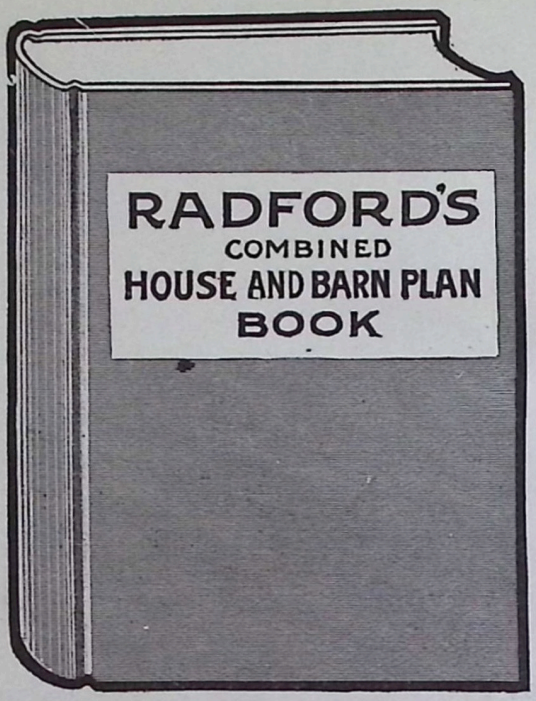
NEW COMBINED HOUSE AND BARN PLAN BOOK



At A Cost of Many Thousands of Dollars and years of experience of hundreds of the most practical building experts, we have just completed the only COMBINED HOUSE AND BARN PLAN BOOK in existence. It contains about 300 pages, size 8x11 inches, and is handsomely bound in Red Art Boards, making an attractive and durable binding.

Two Massive Books Bound In One and illustrated with over Twelve Hundred Copper Half Tone Plates and Zinc Etchings which were drawn especially for this work. It contains over 300 Houses, Barn and Farm Buildings, designed and drawn by the best architects and selected for their popularity with the Building Classes.

The Houses Illustrated were selected for their excellence, practical design and economical arrangement. Perspective Views and Floor Plans being shown complete, together with estimates of cost.

The Farm Buildings in this book are illustrated by large drawings of floors, sides, ends and frame work, together with perspective views sufficient to guide the contractor or builder in the construction of any of the buildings described.

Any Person Contemplating Building a house, barn or other farm building, or any one contemplating making any improvements on their farm, should secure a copy of this massive work, which will be so valuable in helping them to select a design which will be at once practical from every point of view and at the same time economical.

This New and Up-to-Date Book has just been compiled by The Radford Architectural Company, which is the logical place to look for plans and information on the building of popular priced houses, barns and farm buildings. The Radford Architectural Company is the largest of its kind in the world. They design and sell more complete plans and specifications for all kinds of buildings and they are the largest publishers of Building and Reference Books in the world.

The New Combined House and Barn Plan Book, postage paid.....$1.00

New $5,000 Book of Barn Plans

The combined thought and work of the best minds in the country in regard to farm buildings. It cost several thousand dollars to compile the book, besides the cost of printing and publishing it. It contains what might be termed a veritable storehouse of practical barn lore not to be found within the covers of any other book, or obtainable in any other way.

The Illustrations in the book are large drawings of floors, sides, ends and frame work, together with perspective views, sufficient to guide any carpenter or builder in the construction of same. It is a book which should be in every farm home, if you only intend to repair a little, or just build a small chicken coop. It is a good thing to even sit down and read, as the knowledge so gained will be highly valuable in hundreds of other ways.

Great Many of the barn plans in this book have been contributed by farmers themselves from all over the United States and Canada, and are therefore the product of practical experience from farmers who have learned by actual necessities the barn that was most practical and best suited to their needs. They are not fancy barns and buildings, but practical barns such as every farmer likes. They contain a great many little advantages that are not usually found in ordinary barns.

Each and Every Plan in the book is accompanied by a lengthy written description explaining and giving the details of the drawings, and so worded and arranged, numbered and indexed, that it must be readily understood by anyone who reads it. Your money back if you are dissatisfied.

Our New $5,000 Book of Practical Barn Plans shows just what every farmer needs. It contains drawings, pictures, plans, specifications and everything necessary and up-to-date for a barn, stock shed, wagon shed, corn crib, poultry house, hog house, horse barn, smoke house, ice house, silo, dairy barn or any other conceivable out-building on the farm. Not only one plan of each, but many of each are shown with all the latest inventions and contrivances for saving time, money and labor.

This Book Was Compiled by Mr. Wm. A. Radford, President of "The Radford Architectural Co.," Author of "The Steel Square and Its Uses," and "Practical Carpentry," and the best authority in the country on all matters pertaining to the building industry.
